SPECIFICATION

The BMSS Pro by WhisperPower is a high-precision smart battery monitor designed for demanding marine and off-grid electrical systems. Using a 1200A shunt, it provides real-time data on voltage, current, remaining capacity, and battery autonomy. Compatible with all battery types, including Li-Ion, and operating on 12V, 24V, or 48V, it integrates seamlessly via WhisperConnect (CAN-bus) with WhisperPower chargers, generators, and inverters. Data is accessible through WPTouch control panels. With DIN-rail or wall mounting options, local LED interface, programmable alarms, and USB connectivity, the BMSS Pro is a complete solution for advanced battery management.
