Cristec UPS Solo series - 24 V 500 VA

Réf : **SEEL006052B**

The purpose of sine wave inverters is to transform the DC voltage of batteries into a 230VAC/50Hz AC voltage. The sine wave inverters in the SOLO range generate a sine wave identical to that of the mains, making them suitable for sensitive applications such as IT, lighting, hi-fi and domestic appliances.

CARACTERISTICS

CRISTEC UPS SOLO SERIES - 24 V 500 VA

Réf. **SEEL006052B**

Dangerous material : non

Weight : 4,57 kg.

- Dimensions : 240 x 142 x 84 mm
- Length : 240 mm
- Weight : 4.5 kg
- Depth : 84 mm
- Max. power : 600 VA
- Width : 142 mm
- Type of seal : IP20

SPECIFICATION

The purpose of the inverters is to convert the DC voltage from the batteries into 230 VAC - 50 Hz AC voltage. SOLO technology, using digitised signals, has reduced the number of components and increased the reliability of the devices.

- Input voltage: 12, 24 or 48 Vdc -12% +30
- High overload for motor starting
- High efficiency
- Reduced standby power consumption
- Built-in fuse protection
- High reliability, reduced size and weight
- Output use: Voltage 230 Vac Mono at 50 Hz / Power from 200 VA to 2500 VA
- Made in France
- Option: Remote on/off remote control for 800, 1000 and 2000 VA nominal models ref. SEEL007130
