CARACTERISTICS

RUTLAND WIND TURBINE 1200 - 12 V
Réf. **WG120012**

Dangerous material : non
Weight : 12,40 kg.
Catalog page : 252

- Weight : 7.8 kg
- Max. power : 500 W

SPECIFICATION

- Starting at a speed lower than 5 knots of wind
- Reliability and robustness: Powerful and robust generator - permanent magnets in neodymium for an optimal output
- Excellent aerodynamics: The quietest in its category thanks to its thermoformed Tri-namic blades
- Max. power: 500 W

Regulator included in the wind turbine package :

- MPPT hybrid controller 100% electronic wind / solar
- Solar panel input up to 250W (12V) or 500W (24V)
