Réf. **WP50212030**

- Thread : M8
- Model : 50212030

Dangerous material : non

Weight : 0,01 kg.

SPECIFICATION

MEGA fuses are suitable for 12V and 24V battery systems and are primarily intended for protection against short circuits as they are slow-blow fuses. Main applications include battery, alternator, and wiring protection. Due to their low interrupting capacity of 2 kA, MEGA fuses are not suitable for use on large battery banks.
