- Type of electric toilet : with pump
- Type of level gauge : draining

SPECIFICATION

Quiet marine toilet available in two versions - with solenoid valve for freshwater flushing OR with Par-Max pump for flushing with sea, river or lake water. Designed for pleasure boats, it is also suitable for commercial vessels.

Quick-connect system for macerator pump on toilet base

- Clip fastening for quick disassembly of pump and discharge pipe for servicing if required
- Tool-free disassembly to release the pump assembly from the toilet base

Easier installation

- New multi-position base allows the pump to be installed on the left, right or rear of the bowl, depending on on-board possibilities
- Evacuation pump can be rotated 180° to adapt to the orientation of the base and ensure proper evacuation towards the rear of the toilet
- Straight or 90° drain outlet for easy installation

New touch-sensitive control panel

- Elegant new design - black cover and screen
- Touch operation
- 3 possible settings

- Ecological rinsing (only 1 liter of water)
- Complete rinse and drain
- The touch panel also allows for a no spill ‘empty’ function to leave the bowl dry when the boat is in motion.

Other Quiet Flush E2 features

- Quiet soft close seat on regular bowls
- Bowl available in 2 sizes: Standard (Regular) or Compact
- Materials: Porcelain bowl, plastic seat (Standard) or wood seat (Compact)
- Water supply, ø 19 mm inlet hose
- Black water discharge, ø 25 mm outlet hose
