Stainless steel ratchet tensioner - width 50 mm - breaking capacity 3 tons

Réf : **1070502**

The safety-opening ratchet tensioner, designed specifically for 50 mm wide straps, is a standard feature in textile lashing systems. It consists of a toothed wheel and a handle fitted with a ratchet that enables the strap to be tensioned by winding it around a pin. To tension the system properly, simply lift the handle on the tensioner, which causes the toothed wheel to rotate and the webbing to be wound.
