CARACTERISTICS

RESIN BEARING 50 X 70 X 200 MM

Réf. **BAG507020R**

Dangerous material : non
Weight : 0,52 kg.
Catalog page : 77

- External diameter : 70 mm
- Internal diameter : 50 mm
- Length : 200 mm
- Material : Phenolic resin

SPECIFICATION

These bushings are designed for use in environments where water lubrication is preferable to the use of traditional lubricants such as oil or grease. They are often used in applications where contamination from traditional lubricants must be avoided, such as in the food, pharmaceutical and chemical industries.
