

2-component mixture Unifix 300 S anthracite

Réf : **IN0714505020**

Two-component injection material, ideal for assembly and maintenance work in the construction industry. Its fast-curing, slightly extensible formula ensures excellent adhesion to a variety of materials, including plasterboard, hollow brick, natural stone, concrete and more.
Packaged in 50 ml double cartridges and used with the Mixer Gun, Unifix 300 S is economical and easy to apply.

CARACTERISTICS

2-COMPONENT MIXTURE UNIFIX 300 S ANTHRACITE

Réf. **IN0714505020**

Dangerous material : non
Weight :
Catalog page : 140

- Units in box : Twin cartridge
- Model : Unifix 300 S - Low viscosity injection adhesive
- Color : Charcoal grey
- Type of adhesive : Polyurethane

SPECIFICATION

Unifix 300 S is a two-component, fast-curing, slightly extensible injection solution, ideal for a variety of assembly jobs in the construction and maintenance sector, including repairing worn drilled holes. Thanks to its exceptional adhesion, it speeds up and simplifies assembly work.

Advantages of Unifix 300 S :

- Fixing Versatility: Unifix 300 S effectively solves fixing problems on partitions, hollow bricks, poorly drilled or too large holes, and damaged drill holes.
- Optimum Adhesion: The two-component PU injection polymer expands in the borehole, creating a strong mechanical and chemical bond to a variety of materials.
- Material Compatibility: Adheres perfectly to plasterboard, hollow bricks, natural stone, concrete, millstone, ceramic bricks and aerated concrete blocks, often without the need for prior drilling.
- Efficient to use: The double 50 ml cartridge is applied with the Mixer Gun for precise, economical dosing. The ergonomic gun facilitates consistent, precise application.
- Durability: The special Mixer Gun ensures even mixing and prevents any remaining product from hardening, so the opened cartridge will keep for a long time.
- Withstands temperatures from -20°C to +90°C
