- Color : Black
- Material : Polyurethane
- Type of adhesive : Polyurethane

SPECIFICATION

Thanks to its unique formula, Repaplast Fix offers extremely strong gluing results. Repaplast Fix is also flexible to a certain extent, which allows the product to be used for a variety of applications. When combining the use of Repaplast Fix with Repaplast Primer, you will get a unique combination of products which can even be used on the most difficult surfaces such as recycled plastic, natural stone, metal and stainless steel. Repaplast Fix is also perfect for a wide range of emergency repairs.

Repaplast Fix offers great firm results and has an optimal spray clean interval. This makes it perfectly suitable for vertical glue joints that cannot be glued or modelled in one go. Repaplast Fix is available in two shades: black and white. The white colour allows you for instance to repair almost any light-coloured lighting units in the vehicle industry. The product is also available in black for gluing black-coloured and inconspicuous applications.

Repaplast Fix is very user-friendly and can be dosed very accurately thanks to the handy dual cartridge and the use of the Mixer Gun. The special mixer nozzle ensures the right mixture proportions and prevents the remaining product from hardening in the cartridge. This means that an opened cartridge of Repaplast Fix can still be kept for a long time.

- Excellent adhesive power on many different surfaces.
- Ultra fast drying.
- Glued part can be handled soon after application.
- Good temperature resistance.
- 2-component product for quick gluing.

- Handy dual cartridge with mixer nozzle for accurate application.
- Exempt from H351 thanks to MicroEmission.
- NSF registered (class S4), register number 161928.
