CARACTERISTICS

2-COMPONENT METHYLMETHACRYLATE GLUE METAL WELD 50 ML WHITE

Réf. **IN0714600100**

Dangerous material : non
Weight :
Catalog page : 140

- Units in box : Twin cartridge
- Model : Metal Weld
- Color : White
- Type of adhesive : Méthacrylate de méthyle

SPECIFICATION

Thanks to its special composition, this product allows strong and durable bonding to various metal surfaces such as steel and aluminium, as well as to a wide range of composite materials. After curing, Metal Weld guarantees excellent adhesion and high shear strength. Best of all, no prior application of primer is required to achieve optimal results.

With Metal Weld, you have an advanced bonding solution for your structural bonding needs, offering ease of use, exceptional adhesion and durability for reliable, strong results.

- Two-component product for bonding almost all ferrous and non-ferrous metals
- Excellent adhesion
- Available in white and black
- Excellent UV and chemical resistance
- Good temperature resistance
- Application without primer
- Practical double cartridge with mixing nozzle for precise dosing
- Isocyanate-free
