CARACTERISTICS

B400 SIMPLE LEVER ENGINE CONTROL
Réf. **B400**

- Number of levers : 1 lever

Dangerous material : non
Weight : 2,60 kg.

SPECIFICATION

Featuring a lever and a bracket made of AISI 316 stainless steel, the B400 housing combines a modern and elegant design, making it an ideal choice for sailboats. Its unique control mechanism allows smooth ""push"" or ""pull"" movements for both the throttle and the gearshift, with the option to warm the engine using a dedicated push-button that puts the engine in neutral. Compatible with 33C-type cables without the need for an adapter, the B400 housing provides optimal functionality and sophisticated aesthetics for an exceptional sailing experience.
