SPECIFICATION

BusThe Blue Sea Systems PowerBar 8x3/8-16 Stud Terminal Bus is designed to provide an organized power distribution system for a variety of 12V or 24V DC electrical circuits. It features eight 3/8-16 threaded studs for connecting circuit protection and power distribution components. Each stud features a knurled rim for easy tightening of components. The bus bar is made of tin-plated copper for superior corrosion resistance and includes multiple mounting holes for secure installation.
