CARACTERISTICS

APELO A2 ALUMINUM RGB UNDERWATER SPOTLIGHT, 3000 LM

Réf. **AP2ARGBN1**

Dangerous material : non
Weight : 0,49 kg.
Catalog page : 343

- Angle : 90°
- Diameter : 95 mm
- Protection rating : IP68 / IP69
- Luminous flux : 3000 lm
- Weight : 360 g
- Depth : 23.5 mm
- Power : 30 W
- Type : Freshwater use
- Complies with : EN55015/ CISPR 15, IEC60533, IEC61547, ICES-5
- Color : Dark gray
- Color of lighting : Multicolour RGB
- Material : Aluminium
- Lighting technology : Led
- Mounting method : Surface mounted

SPECIFICATION

Using state-of-the-art materials and integrated optical intelligence for exceptional brightness, Apelo A2 delivers an impressive 3,000 lumens of light output.

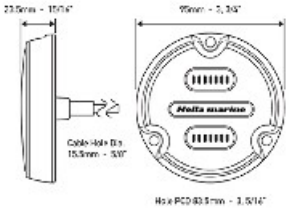

Apelo's optical intelligence efficiently directs light patterns downwards, with a narrow vertical angle but a wide horizontal reach, guaranteeing increased brightness when viewing from above. A tough, UV-resistant Grilamid lens ensures exceptional transparency and unrivalled durability.

The Apelo A2 series introduces innovative Edge Light technology, which creates accent lights around the lamp. Edge Light mode gently wraps the back of the lamp in pure white light for utility and accent purposes.

Manufactured and designed in New Zealand, Apelo underwater lights meet international standards and are distinguished by their solidity, precise fit and high-level finish. The Apelo A2 model is designed for surface mounting and is available with a hard-anodized aluminum housing, suitable for a variety of hull materials.

Thanks to advanced electronics, these lamps guarantee reliable illumination and offer protection for the lamp, even in the event of severe voltage fluctuations or low battery levels. Apelo lamps are specially designed to minimize potential interference with radios, mapping systems and other on-board equipment, and come with a 5-year warranty.
