CARACTERISTICS

AIR HANDLING UNIT CLIMMA 500 M3/H

Réf. **TA2255**

Dangerous material : non
Weight :

- Capacity : 20.000 BTU/H
- Dimensions (LxDxH) : 552 x 463 x 455 mm
- Maximum current : 11 A
- Model : Mistral 750
- Weight : 34 kg
- Depth : 463 mm
- Height : 455 mm
- Width : 552 mm
- Air flow : 500 m³/h

SPECIFICATION

Climma air-handling units have been specifically designed for marine air-conditioning systems, where on top of air conditioning and dehumidification, the HVAC system is also required to treat and clean the internal air.

In order to always have the best comfort on-board, Climma air-handling units guarantee a fixed periodic air change inside the boat, always mantaining a constant amount of air changes per hour and internal humidity.

With powerful but yet silent blowers and high efficiency heat exchangers, Climma air handling units can always guarantee the best comfort on-board.

Strengths of Mistral unit:

- Smallest size and easy to install
- Powerful yet quite blowers to improve air flow
- Perfect temperature and humidity control thanks to the high efficiency heat exchangers and water valve
- High efficiency G4 filters
- Digital Climma controller
- Modbus interface available as standard
