SPECIFICATION

SOLAS vests are designed for professional use: merchant ships, fishing vessels, wind, oil or offshore platforms...

They offer an optimal level of technicality to enable professionals to carry out their activity in complete safety.

One size: from 43 kg.Waist circumference: 55-175 cm.

Unrivalled performance

- Actual buoyancy increased to 180N.
- Dual chamber with 2 independent percussion systems.
- Release system equipped with CO_2 cylinder anti-unscrew.
- Manual and automatic release.

- Asymmetrical air chamber with articulated collar to optimize freeboard and rollover while providing head-out-of-water support.

Controlled design & durable materials

- Tough, flexible technical fabrics.
- Outer cover closed by a YKK QBZ® (Quickburst) zip, for better inner tube protection, prevents unexpected cover openings.
- Zip with 2 opening points for faster inflation.

Maximum equipment level

- Integrated harness.
- Double subcutaneous.
- Integrated SOLAS flashlight.
- Pocket with reminder tip.
- Strap for emergency beacon and accessories.
- Belt with quick-adjust buckle.
