CARACTERISTICS

SELF-LOCKING SHACKLE Ø 10 MM - CMU 860 KG

Réf. **1001245**

Dangerous material : non

Weight : 0,14 kg.

Catalog page : 507

- Work load : 1520 kg
- Units in box : Bulk
- Diameter : 10 mm
- Length : 47 mm
- Weight : 137 g
- INITIAL_LETTER_SCHEMA_A : 47 mm
- INITIAL_LETTER_SCHEMA_C : 10 mm
- INITIAL_LETTER_SCHEMA_D : 20 mm
- INITIAL_LETTER_SCHEMA_B : 20 mm
- INITIAL_LETTER_SCHEMA_E : 9 mm
- INITIAL_LETTER_SCHEMA_F : 71 mm
- INITIAL_LETTER_SCHEMA_G : 52 mm
- Width : 20 mm
- INITIAL_LETTER_SCHEMA_H : 32 mm
- INITIAL_LETTER_SCHEMA_M : 52 mm
- Material : Stainless steel,stainless steel

SPECIFICATION

The 316L stainless steel self-locking lyre shackle is an ideal solution for industrial applications requiring greater travel and safe lifting conditions. Thanks to its self-locking system, the shackle head locks effectively into one of the notches in the shackle body, preventing accidental unscrewing and ensuring safe handling.

Forged from 316L stainless steel, this shackle offers excellent corrosion resistance, making it ideal for use in demanding marine or industrial environments. With a remarkable working load and breaking load capacity, it guarantees reliability and longevity in all your lifting operations.

The lyre shackle can also be used to attach several sheets or ropes, offering great versatility of use, particularly when you need greater travel. Certified with CE marking, it complies with the strictest safety standards for industrial lifting operations.

Key features:

- 316L stainless steel: high resistance to corrosion
- Secure self-locking system: prevents accidental unscrewing
- High load capacity (CMU) for industrial lifting applications
- CE marked for maximum safety
- Large opening for attaching several cables or sheets
- This self-locking shackle is the perfect choice for professionals looking for a robust, safe tool for lifting work in marine or industrial environments.
