

Low resistance marker buoy Ø 310 mm - yellow

Réf : **LR2J**

Designed for the professional fishing industry, LOW RESISTANCE (LR) fender buoys reduce drag at sea thanks to their specific shape. Available in four sizes, they combine strength, ease of retrieval and durability. Each model is fitted with sturdy rope supports and a replaceable spring-loaded valve for easy maintenance.

CARACTERISTICS

LOW RESISTANCE MARKER BUOY Ø 310 MM - YELLOW

Réf. **LR2J**

Dangerous material : non
Weight : 2,10 kg.
Catalog page : 512

- Diameter : 310 mm
- Length : 600 mm
- Model : LR-2
- Weight : 2.1 kg
- Color : Yellow
- Type of fender : with rings

SPECIFICATION

The LR range of fender buoys has been specially developed to meet the demands of the professional fishing industry. Their bullet-shaped design significantly reduces drag during operations at sea, particularly when retrieving lobster or crab traps.

Technical specifications:

- Optimised shape: The elongated shape reduces water resistance, making it easier to manoeuvre in difficult conditions.
- Robust material: Made from high-quality materials, they are extremely durable.
- Attachment system: Fitted with sturdy black rope brackets and, for the LR-4 model, a stainless steel eyelet for added strength (option available for other sizes).
- Replaceable spring valve: Made of metal/brass, easy to maintain and replace.
- Quality control: Each buoy is immersion tested to ensure no leaks before packing.

Applications:

- Ideal for buoy marking and lifting operations in demanding marine environments, they are particularly suitable for pot fishing and the needs of professional fishermen.
