AQUA-BASE FIJI ESSENTIAL WATERMAKER 65 L/H 24 V

Réf. **FIJI65E24**

Dangerous material : non
Weight : 82,00 kg.
Catalog page : 222

- Production capacity : 65 L/H
- Consumption : 12.5 A
- Model : Fiji Essential - ESB
- Weight : 42 kg

SPECIFICATION

The Aqua-base Fiji / ES range offers an energy-recovery watermaker that's easy to install because it's so compact, and perfectly suited to boats with very limited on-board energy.
This freshwater production unit is fully hydraulic, operating exclusively on low-pressure water supplied by the booster pump. Its hydraulic amplification system automatically adjusts the operating pressure and the flow of water through the diaphragm.
With power consumption reduced to just 12 A at 12 volts, for a production rate of 35 liters per hour, this unit is distinguished by its extremely quiet, adjustment-free operation, guaranteeing simple, comfortable use.
Standard features of the Fiji Essential Desanilizer (ESB) :

- On / off button
- Low-pressure pump
- 5-micron filter
- Energy recovery
- High-rejection membranes
- High and low pressure mechanical safety device
- High and low pressure gauge
- Dual-voltage option: 12 V / 230 V or 24 / 230 V
