- Production capacity : 105 L/H
- Consumption : 17 A
- Model : Fiji Premium
- Weight : 54 kg

SPECIFICATION

The Aqua-base Fiji / ES range offers an energy-recovery watermaker that's easy to install because it's so compact, and perfectly suited to boats with very limited on-board energy.

This freshwater production unit is fully hydraulic, operating exclusively on low-pressure water supplied by the booster pump. Its hydraulic amplification system automatically adjusts the operating pressure and the flow of water through the diaphragm.

With power consumption reduced to just 12 A at 12 volts for a production rate of 35 liters per hour, this unit is distinguished by its extremely quiet, adjustment-free operation, guaranteeing simple, comfortable use.

Fiji Premium watermaker features:

- Remote, flush-mounted touchscreen control panel
  - Power box retains buttons and indicators
- Automatic rinsing as standard
- Production programming, periodic automatic rinsing, secondary menus
- Filter clogging control
- Salinity control and pump protection
- Low-pressure pump

- 5-micron filter
- Energy recovery
- High-rejection membranes
- High and low pressure mechanical safety
- High and low pressure manometer

Fiji Premium watermaker options:

- Remote control via additional remote display
- Communication box to on-board display
- Dual voltage: 12 V / 230 V or 24 / 230 V
