- Type of antifouling : hard matrix

SPECIFICATION

Tin-free, hard matrix antifouling with high copper content, designed for the maintenance of boats immersed in medium to heavily fouled waters

CHARACTERISTICS :

- This antifouling is suitable for all substrates: polyester, steel, wood, except those made of light alloys (do not apply to aluminum).
- This antifouling, based on acrylic binders, allows direct adhesion to a previously deglazed and primed polyester substrate.
- Hard matrix antifouling is compatible with most antifoulings.

Dangerous. Observe safety precautions.

Use biocides with care. Before use, read the label and product information

For the present product: 0.75L, color black.
