SPECIFICATION

Designed to ensure safe access to vessels in all situations. Made from robust, reliable materials, this ladder features hardwood treads for optimum strength and 4-strand manila ropes for exceptional durability. The four rubber bottom treads provide extra stability, even in difficult marine conditions.

This ladder is ideal for emergency situations, as well as day-to-day embarkation and disembarkation of crew or pilots. Designed to meet the demanding standards of the maritime sector, it combines safety, reliability and durability.
