CARACTERISTICS

UP12/OIL GEAR PUMP FOR LUBRICATING OIL 12 V

Réf. **UP12OIL12**

Dangerous material : non

Weight :

- Flow : 6-15 L/min
- Diameter : 12-16 mm
- Thread : 1/2 ""
- Weight : 4.5 kg
- Pressure : 3 bar
- Fuse protection : 15 A

SPECIFICATION

Self-priming electric pump with bronze helical gears, specially designed for transferring lubricating oils and viscous liquids. Its nickel-plated brass body and stainless steel shaft ensure robustness and durability. Ideal for draining crankcases and greasing operations, it ensures smooth, efficient flow, even with high-viscosity fluids.
