- Type of adhesive : Polyurethane

SPECIFICATION

Transparent two-component adhesive for plastic repair, developed for fast and durable repairs in professional environments. Its formulation provides excellent adhesion to almost all plastics and enables repairs with particularly short waiting times.

With an **open time of approximately 25 seconds**, PLASTIC FIX cures extremely quickly and becomes touch-dry very rapidly, allowing the repaired component to be put back into service and further processed in a very short time.

Its **transparent finish** allows for discreet repairs that blend easily with most plastic parts and components. The product also offers **extremely high tensile strength** and good temperature resistance.

- **Product type:** two-component repair adhesive
