Tinned flexible cable - 4mm² - black - 500m

Réf : **CM4N500**

Ultra-flexible single-core cable with tinned copper conductor for excellent corrosion protection.

Classic delivery

CARACTERISTICS

TINNED FLEXIBLE CABLE - 4MM² - BLACK - 500M

Réf. **CM4N500**

Dangerous material : non
Weight : 22,43 kg.
Catalog page : 287

- Nominal current : 39 A
- Units in box : Coil
- Length : 500 m
- Model : P205904
- Color : Black

SPECIFICATION

These cables are designed for performance and durability in harsh environments. Thanks to their PVC insulation, these cables can withstand temperatures from -30°C to 70°C, and are resistant to fuels, lubricating oils and diluted acids. Their extra-flexible sheathing facilitates installation, while tinned copper conductors offer optimum protection against corrosion, an essential asset for marine applications. Compared with bare copper cables, this thin-insulated model offers a significant reduction in weight and volume, ideal for complex electrical harnesses. Its robustness guarantees excellent resistance to abrasion, cuts and moisture, ensuring enhanced reliability in low-voltage applications up to 60 V.
