Tinned flexible cable - 6mm² - black - 100m

Réf : **CM6N100**

Ultra-flexible single-core cable with tinned copper conductor for excellent corrosion protection.

Classic delivery

CARACTERISTICS

TINNED FLEXIBLE CABLE - 6MM² - BLACK - 100M

Réf. **CM6N100**

Dangerous material : non
Weight : 6,35 kg.
Catalog page : 287

- Nominal current : 50 A
- Units in box : Reel
- Length : 100 m
- Model : P205909
- Color : Black

SPECIFICATION

These cables are designed for performance and durability in harsh environments. Thanks to their PVC insulation, these cables can withstand temperatures from -30ºC to 70ºC, and are resistant to fuels, lubricating oils and diluted acids. Their extra-flexible sheathing facilitates installation, while tinned copper conductors offer optimum protection against corrosion, an essential asset for marine applications. Compared with bare copper cables, this thin-insulated model offers a significant reduction in weight and volume, ideal for complex electrical harnesses. Its robustness guarantees excellent resistance to abrasion, cuts and moisture, ensuring enhanced reliability in low-voltage applications up to 60 V.
