SPECIFICATION

The Glénan vertical LED chart table lamp is designed to provide wide, comfortable lighting, perfectly suited to reading nautical charts or working in the cabin. Thanks to its vertical mounting bracket, it effectively resists the movements of the boat, especially when mounted against a bulkhead. Its adjustable flexible arm starts directly from the vertical, allowing precise and stable positioning of the light. Easy to install with the two screws provided, it comes with 10 cm of stripped cable for easy connection. Equipped with CREE® LEDs renowned for their quality and robustness, this lamp guarantees reliability and durability in a marine environment. For added comfort and aesthetics, a neoprene protective sleeve for the flexible arm is available as an option, in brown (01690) or black (01689).
