CARACTERISTICS

OP3GS CONTROL PANEL FOR SL2, CL2 AND CL3 SEARCHLIGHTS

Réf. **OP3GS**

Dangerous material : non
Weight : 24,10 kg.
Catalog page : 324

SPECIFICATION

The **OP3GS operator panel** is designed to deliver **precise and flexible control** of Luminell searchlights from the **SL2, CL2 and CL3 series** (basic functionality also available for SL1). Using an **Ethernet network connection**, it integrates seamlessly into complete system solutions where multiple operator panels and searchlights can be linked. All panels act as **master units**, meaning any panel can control any searchlight at any time.

The OP3GS comes with 0.9 m pigtail cables for **24 VDC power** and an **Ethernet RJ45 connection** including an extension socket. For installations with multiple panels or searchlights, simply add an Ethernet switch with the required number of ports.

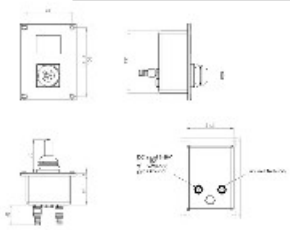

With its **IP56 rating**, the OP3GS is rugged and built for maritime environments, ensuring long-lasting performance even under challenging conditions.

Key features:

- Full control of SL2, CL2 and CL3 searchlights (basic on SL1)
- Ethernet network connection for scalable systems
- All panels operate as master controllers
- IP56 protection for reliable outdoor use

- Supplied with cables and RJ45 extension socket
