SPECIFICATION

This compressed air horn is a high-quality piece of marine equipment that complies with international sound signalling requirements (COLREG 1972 - IMO Class III). It comes complete with a Ø300 mm horn in black, chrome or white finish, an electric valve and a mounting kit for quick and easy installation.

Operating with an air pressure of between 6 and 12 bar, this horn guarantees powerful, reliable sound performance, essential for safe navigation.

This product benefits from numerous internationally recognised approvals:
RINA, LLOYD'S REGISTER, MCA, BUREAU VERITAS, BSH and NMMA, attesting to its compliance with the most stringent standards in the maritime sector.
