

Movline Plus 12-Strand Mooring Rope Ø 64 mm – Length 100 m

Réf : **MOV6412100**

Movline Plus rope is made from high-tenacity bi-polymer composite fibre, offering extreme strength and enhanced durability. Thanks to its textured outer surface, which improves grip and protects the inner fibres from abrasion, it guarantees a long service life, even in demanding conditions. Lightweight and buoyant, Movline Plus ropes do not absorb water, making them easy to handle, especially for mooring ships and aquaculture installations. Translated with DeepL.com (free version)
