CARACTERISTICS

AV SERIES 12 V ELECTRIC JACK FOR HATCHES - 300 MM

Réf. **AV3012N**

- Diameter : 48 mm
- Length : 677 mm
- Model : AV3012N

Dangerous material : non
Weight : 2,49 kg.
Catalog page : 473

SPECIFICATION

The AV hatch lifters are electromechanical products, especially designed for marine use on pleasure boats.

They allow full or partial opening and closing of heavy engine hatches, peak tanks, hatch beams etc. By activating a switch, it is possible to lift the hatch to any desired position from closed to full open; an internal self-locking mechanism will maintain the position preventing any accidental hatch closing. In case of a power failure an emergency device allows for manual opening.

- According to the load required, the AV hatch lifter can be mounted individually, or in twin cylinder installation for heavier loads
- Maximum load for single installations: 1200N (120 kg - 265 lbs)
- Maximum load for dual installations: 2400N (240 kg - 529 lbs)
- Maximum load is recommended not to be exceeded
- Supplied with all mounting hardware
- Stainless steel telescopic ram for manual operation in case of emergency
- Circuit breaker to stop accidental overloading of the system and electronic stop at closed or full open position
- IP 65 protection rated
- Speed: 25mm/sec no load applied, 17 mm/sec maximum load
- Current absorption in single installations: 10A at 12V, 5A at 24V
- Current absorption in dual installations: 20A at 12V, 10A at 24V
- AV 12VDC models are Ignition Protected. UL1500 - ISO8846 approved
