Weight :
Catalog page : 429

- Dimensions : 120 x 48 x 32 mm
- Frequency : 156.525 MHz
- Weight : 119 kg
- Autonomy : 12 h

SPECIFICATION

The SeaSafe M200 is a compact, Class M–compliant AIS man-over-board locator that simultaneously alerts via AIS, DSC, and 121.5 MHz for maximum rescue visibility. It includes dual strobe lights (infrared and white), fast GNSS positioning via GPS and Galileo, and transmits up to 8 AIS messages per minute with precise coordinates. The integrated DSC receiver stops distress broadcasts once acknowledged, optimizing search efforts. Designed for seamless lifejacket integration, it activates automatically (or manually) upon inflation. NFC-enabled, it pairs with the Ocean Signal mobile app for battery status, self-test history, and MMSI programming.
