MAGIC REBOARD EMERGENCY LADDER FOR PONTOON

Réf. **ECHSPT**

Dangerous material : non
Weight : 1,10 kg.
Catalog page : 430

SPECIFICATION

The Magic Reboard emergency ladder is specially designed to enable safe and efficient climbing from pontoons. Its bright orange colour and retro-reflective strip ensure optimal visibility for the user and for people on board the pontoon.

Easy to install, the ladder attaches to the pontoon rails via stainless steel eyelets placed above a rigid marking plate, close to a cleat and above a float. The offset handle makes it easy to climb, and deployment is quick thanks to the cord.

Robust and durable materials: polyester strap ladder with rigid reinforcement, high-strength polyester case coated with PVC on both sides, polyethylene back, reflective polypropylene strap edging and Ø14 mm stainless steel eyelets.

This compact and reliable ladder is an essential piece of equipment for all pontoons, combining safety, visibility and durability.
