MP90 exhaust silencer

Réf : **VEDEMPMP90**

Vetus DEMPMP water-injected silencer (plastic muffler MP series): noise reduction of up to 30%, active water mixing for minimum back pressure, compatible with pipes from 40 to 102 mm in diameter.

CARACTERISTICS

MP90 EXHAUST SILENCER
Réf. **VEDEMPMP90**

Dangerous material : non
Weight : 1,26 kg.
Catalog page : 83

- Inlet/outlet diameter : 90 mm
- Diameter : 90 mm
- Outlet diameter : 90 mm
- Inlet diameter : 90 mm
- Length : 456 mm
- Height : 130 mm
- Width : 180 mm

SPECIFICATION

The Vetus DEMPMP (MP-series Plastic Muffler) silencer is specially designed for water injection exhaust systems in marine environments. Thanks to an internal baffle system, it ensures effective mixing of water in the exhaust gases, significantly reducing noise while minimising pressure loss. Compatible with inner pipe diameters ranging from Ø 40 mm to Ø 102 mm, it supports engine powers from 18 to 114 kW (24 to 155 hp) under maximum back pressure conditions of 0.1 bar.
Easy installation: horizontal position recommended, use of 12 mm stainless steel clamps (x2) per connection, then tubular connection with a downward slope to prevent water stagnation or backflow to the engine.
Precautions: temperature alarm recommended (plastic limited to 70°C), provide an air intake system or anti-siphon valve if the injection point is less than 15 cm above the waterline, drain before winter storage
