SPECIFICATION

The Glénan horizontal LED chart table lamp provides wide, even lighting, ideal for reading nautical charts or activities requiring clear vision in the cabin. Its horizontal base ensures stable and sturdy mounting, even in sailing conditions, while the adjustable flexible arm allows the light to be directed with precision. Installation is simplified thanks to the two screws provided, and the lamp comes with 10 cm of stripped cable ready for connection. Designed with high-quality CREE® LEDs, it guarantees excellent durability and consistent performance in the marine environment. For a neat finish and enhanced protection of the flexible cable, a neoprene sleeve is available as an option in brown (01690) or black (01689).
