SPECIFICATION

The ORION V3 is a certified safety device designed to ensure secure and reliable transmission of engine orders between the bridge and the engine room. Approved by Bureau Veritas, it supports communication between 2 to 5 stations using a single power line carrier cable.

Available in flush-mount or enclosure formats (with optional flash and siren), the ORION V3 is built to withstand demanding marine environments, featuring IP44 protection and operating temperatures from 0°C to 55°C. Its multilingual interface (English, French, Spanish), dimmable indicator lights (day/night mode), integrated buzzer (=75dB), and critical system alerts enhance operational safety and clarity.

Key features include:

- Up to 11 command channels (including STOP)
- RS485 serial outputs for VDR and ORION printer
- Visual and audible alarms, with dry contact outputs (24VDC)
- Optimized power consumption: 25mA standby, 150mA max per station
- Flexible installation: flush-mounted or surface-mounted

The ORION V3 is the ideal solution for vessels requiring robust, compliant, and easy-to-integrate engine order communication systems.
