CARACTERISTICS

H20 HYDROSTATIC RELEASE UNIT NON-SOLAS

Réf. **H20RS**

- Model : For NON SOLAS liferaft 4 to 12-person capacity
- Color : Green

Dangerous material : non
Weight : 0,26 kg.
Catalog page : 425

SPECIFICATION

- Activation range: automatic activation between 1.5 and 4 metres depth, ensuring reliable deployment in normal conditions.
- Line break: equipped with a weak link of 1.2 ± 0.4 kN, specifically adapted to small liferafts.
- Capacity: used for liferafts for 4 to 12 people (excluding SOLAS).
- Weight: only 0.28 kg, limiting the impact on the weight on board

Advantages & uses

Thanks to its calibrated break line, this model allows automatic deployment as soon as the minimum depth is reached, without exerting excessive force on the raft. It is particularly suitable for pleasure craft, fishing boats or previous non-SOLAS raft models.
Certifications & compliance

This release mechanism is certified according to recognised international standards — BV (Bureau Veritas) for Type Approval, and USCG for use in the United States.
