# Tinned flexible cable - 2x1,5mm² - black - 30m

Réf : **CM2X1,5N30**

Ultra-flexible multi-conductor cable with tinned copper conductors providing excellent corrosion protection.

CROSSEVEN

**Public price TTC**

Classic delivery

**67.33 €**

## CARACTERISTICS

### TINNED FLEXIBLE CABLE - 2X1,5MM² - BLACK - 30M

Réf. **CM2X1,5N30**

**Dangerous material :** non

**Weight :** 0,52 kg.

**Catalog page :** 287

- Units in box : Reel
- Length : 30 m
- Model : P206411
- Color : Black

## SPECIFICATION

These cables are designed for performance and durability in harsh environments. Thanks to their PVC insulation, these cables can withstand temperatures from -30ºC to 70ºC, and are resistant to fuels, lubricating oils and diluted acids. Their extra-flexible sheathing facilitates installation, while tinned copper conductors offer optimum protection against corrosion, an essential asset for marine applications. Compared with bare copper cables, this thin-insulated model offers a significant reduction in weight and volume, ideal for complex electrical harnesses. Its robustness guarantees excellent resistance to abrasion, cuts and moisture, ensuring enhanced reliability in low-voltage applications up to 60 V.
