

Copper connecting ring terminal Ø 10.5 mm - 25 mm² conductor cross-section - blister pack of 20

Réf : **P204542**

The heat shrink ring and butt terminals provide a reliable and durable electrical connection with enhanced insulation and protection against moisture and corrosion. Made from tinned copper for superior conductivity and corrosion resistance. Suitable for crimping or soldering , these terminals are ideal for demanding electrical applications. Available in packs of 4 or 20 pieces.

SPECIFICATION

The **heat shrink ring and butt terminals** are engineered to ensure a **secure, long-lasting, and waterproof electrical connection** in any environment. Their **heat shrink insulation sleeve** delivers superior sealing performance and **protects against moisture, dust, and corrosion**, guaranteeing reliable operation even in harsh conditions.
Manufactured from **high-quality tinned copper**, they offer **excellent electrical conductivity** and increased resistance to oxidation.
These terminals can be **crimped or soldered**, making them suitable for **industrial, automotive, or marine** electrical installations that require maximum reliability and durability.
Compliant with **CE, ROHS, and REACH** standards, they are available in **packs of 4 or 20 units** to meet professional needs.
Perfect for all applications requiring **safe, sealed, and long-lasting electrical connections**.
