CARACTERISTICS

CCW COMPACT SERIES WINCH - 750 KG

Réf. **CCW4**

Dangerous material : non
Weight :
Catalog page : 536

- Flow : 23 L/min
- Weight : 18 kg
- Pressure : 140 bar
- INITIAL_LETTER_SCHEMA_A : 220 mm
- Hauling speed : 35 m/min
- Pulling force : 750 kg

SPECIFICATION

A simple wire or rope drum hauler for cargo handling etc, with a choice of three hydraulic motor sizes.
The base and bearing assembly are mainly aluminium for light weight. The drum is also aluminium. The sealed bearings require no maintenance.
Working speeds quoted in the specification are in line with fishing requirements. Slower speeds may be more suitable for other duties and a smaller pump, hoses, and reservoir size may then be utilised.
The winch is intended for continuous operation with limited static holding time. There will be a slow rotational 'creep' if the winch is made to hold a static load for an extended period.
A hydraulically released multidisc brake is available if a positive static hold is an essential requirement, combined with an overcentre (motion control) valve to prevent runaway.

- Drum storage capacity: 15 m ø 8 mm
