Steel straight spreader beam STR25 - 2510-5230 mm - Max capacity 25T

Réf : **631024**

The telescopic aluminium straight spreader offers a revolutionary lifting solution, combining light weight with high lifting capacity. With capacities ranging from 5 to 9 tonnes, it is designed to meet the needs of the most demanding operations. Its telescopic design and interchangeable arms make it quick and flexible to use, making it ideal for industrial, marine and construction applications.

CARACTERISTICS

STEEL STRAIGHT SPREADER BEAM STR25 - 2510-5230 MM - MAX CAPACITY 25T

Réf. **631024**

Dangerous material : non
Weight : 522,00 kg.

- Angle : 30
- Length : 7330-12400 mm
- Weight : 522 kg

SPECIFICATION

Optimise your lifting operations with the straight telescopic aluminium lifting beam, an innovation that combines lightness and robustness. Designed to offer top-level performance, this lifting beam is available in several models capable of lifting loads ranging from 5 to 9 tonnes, while being easy to transport and install thanks to its light weight.

Key features:

- Lightweight and easy to transport: With a net weight ranging from 28 kg to 72 kg depending on the model, this telescopic lifting beam is one of the lightest on the market in its category. It's easy to transport and quick to set up on site, saving you considerable time.
- High lifting capacity: Despite its low weight, the spreader can lift loads of up to 9 tonnes, making it ideal for construction sites, warehouses and marine operations.
- Double telescopic arms: The telescopic arms allow great adaptability depending on the size of the loads to be lifted. The double extension version of the STR9+ offers maximum reach for bulky loads.
- Modular design with interchangeable arms: The ability to replace damaged or worn arms ensures longer equipment life and minimises downtime.
- Speed and efficiency: The light weight of the equipment makes manoeuvring easier and lifting tasks quicker, while ensuring maximum safety.
- Durable aluminium construction: Made from corrosion-resistant aluminium, this lifting beam is designed for long-lasting use in demanding environments.
- Applications : Lifting boats, transformers, fans, cars, construction equipment, and more.

Available models:

- Aluex STR5: 5 tonne lifting capacity, 28 kg net weight.
- Aluex STR9: Lifting capacity of 9 tonnes, net weight of 45 kg.
- Aluex STR9+: Lifting capacity 9 tonnes, net weight 72 kg, with double extension for increased reach.
