CARACTERISTICS

T-BOLT COLLAR W4 36-40/20MM - BOX OF 5

Réf. **P207179**

Dangerous material : non
Weight :

- Units in box : Bulk pack of 5
- Diameter : 36-40 mm
- Band width : 20 mm
- Material : 18/8 AISI 304/A2 stainless steel

SPECIFICATION

The intense clamping quality of the dowel clamps ensures high resistance to pressure and vibration. As a result, the junction between pipes is perfectly watertight. Ideal for use with thick pipes. They have been designed with a raised-edge band to prevent damage to the pipes and prevent any risk of injury. The quality of the material used offers prolonged resistance over time. They have excellent corrosion resistance and are perfectly suited to use in marine environments. Easy to install, these clamps can be assembled and disassembled again and again, while retaining their technical properties. If necessary, place two clamps side by side, heads reversed, at each end.
