UP3-R 24 V 15 l/min reversible pump with integrated on/off switch

Réf : **UP3R24**

Designed for transferring diesel and light oils. Part of MARCO's professional pump range, it features a reversible operation function and a sealed switch integrated directly into the motor. Its 3-position switch allows the operator to change the direction of rotation, reversing the flow of the liquid. This feature makes it suitable for transfer operations between tanks, allowing both filling and pumping in the opposite direction. The UP3-R delivers a maximum flow rate of 15 L/min and is available with either a 12 V DC or 24 V DC power supply, depending on the selected version. Its motor has a rated power of 120 W, and the pump assembly features IP65 protection. Compact and designed for professional applications, this MARCO pump provides a practical solution for diesel transfer and refuelling installations.

CARACTERISTICS

UP3-R 24 V 15 L/MIN REVERSIBLE PUMP WITH INTEGRATED ON/OFF SWITCH

Réf. **UP3R24**

Dangerous material : non

Weight :

Catalog page : 168

- Model : Reversible UP3 with ON/OFF switch
- Weight : 1.8 kg
- Fuse protection : 7.5 A

SPECIFICATION

- Self-priming electric gear pump
- Reversible operation with integrated 3-position switch
- Maximum flow rate: 15 L/min
- Power supply: 12 V DC or 24 V DC
- Motor power: 120 W
- Maximum current consumption: 10 A (12 V) / 5 A (24 V)
- Maximum pressure: 2 bar
- Self-priming height: 1.5 m
- Electrical protection: IP65
- Connections: 3/8"" BSPP

- Recommended hose diameter: 13 mm
- Weight: 1.8 kg
