Control panel without microphone 12 / 24 V

Réf : **SBUV**

The control panel has been designed to operate the electronic horns from the cabin. The installation time of the whistle is reduced thanks to the integrated microprocessor electronic card which transmits through only one RJ45 cable all the available functions to the whistle: horn, fog signal, aux input and microphone connection. The electronic card is contained in a waterproof box with built-in option.

- Protection rating : IP66

SPECIFICATION

SB-UV IP67 control panel for electronic horns, designed for easy cabin installation. The integrated electronic board streamlines installation by consolidating all functions of the electronic horn, including the warning signal, automatic fog signal, and VHF input, into a single RJ45 cable. The waterproof box allows for straightforward recessed installation.
