- Depth : 50 mm
- Height : 156 mm
- Width : 188 mm

SPECIFICATION

VETUS switch panels are pre-wired, requiring only the connection of positive and negative power supplies and various services such as lights and pumps. Made from non-corrosive synthetic materials, these panels are highly durable.

The panel dimensions are 188 x 156 mm, with a recess depth of 50 mm. They are suitable for 12-volt DC circuits. In addition, 60 different nameplates (self-adhesive) are supplied for the 12 available positions.
