

Breather filter CCV6000-08R closed circuit - 800 HP - right-hand inlet

Réf : **RACCV60008R**

Breather vapours settle on engine components and require regular cleaning. Vapours drawn into the engine increase maintenance intervals and reduce engine life. Crankcase emissions penetrate precision engine components such as the intercooler, air filters, intercoolers or turbocharger. As they build up, they become deposits that are difficult to clean and reduce performance.

CARACTERISTICS

BREATHER FILTER CCV6000-08R CLOSED CIRCUIT - 800 HP - RIGHT-HAND INLET

Réf. **RACCV60008R**

Dangerous material : non
Weight : 2,50 kg.
Catalog page : 121

- Flow : 566 L/min
- Maximum flow : 566 L/min
- Diameter : 1-5/8 mm
- Thread : 1""-5/8
- Model : CCV6000-08R
- Weight : 2.3 kg
- Depth : 185,4 mm
- Max. power : 800 cv
- Height : 305 mm
- Width : 218 mm
- Type : Right inlet

SPECIFICATION

CRANKVENT and CCV systems protect engines by collecting these harmful emissions. They feature an ultra-fine filtration system and ensure that engines maintain their original performance and longevity. No more seepage or oily deposits on the engines or in the engine room.
