CARACTERISTICS

MICROPROCESSOR SYSTEM
Réf. **6525**

Dangerous material : non
Weight : 7,00 kg.
Catalog page : 16

Automation system for managing various onboard ship functions, capable of accommodating up to 8 control stations.

Its programmable microprocessor enables the management of multiple applications, including:

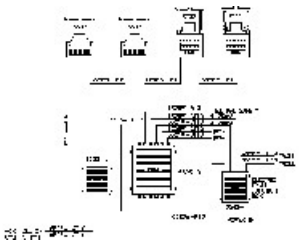

- Mechanical or electrical engine acceleration
- Mechanical or electrical gearbox
- Trolling
- Bow thruster control
- Variable-pitch propeller control
- Propeller shaft brake control
- Can be integrated with the Kobelt steering system

Each installation is unique and requires validation by our engineering department.

SPECIFICATION

Each installation is unique, requiring validation by our engineering department.
