- Type of connector : female

SPECIFICATION

The stainless steel female/female sleeve is a stainless steel fitting designed to securely connect two pipes or threaded elements. The socket has a female end on one side and a female end on the other, allowing easy connection without the need for additional components. Manufactured from high-grade stainless steel, it offers outstanding corrosion resistance, durability and reliability. It is ideal for a variety of industrial and domestic applications requiring a strong, leak-tight connection between two threaded elements.
