- Cable length : 32 - 14 m
- Cable diameter : 5 - 7 mm
- Maximum pull force : 750 kg
- Type of winch : manual
- Brake : no

SPECIFICATION

The Goliath range of ratchet winches is designed for users looking for an entry-level solution for webbing or cable pulling applications. These winches are available in bare version.

During handling, except on a perfectly flat surface, it is imperative to secure the load in traction with another device. This reduces lifting effort by less than 50%.
