Réf. **M50SH**

Dangerous material : non
Weight : 4,95 kg.
Catalog page : 511

- Diameter : 405 mm
- Rod diameter : 16 mm
- Length : 460 mm

SPECIFICATION

The rods and swivels are hot-dip galvanised, and the top of the rods are also coated with black Rilsan for your safety. We use only our quality metal valve and, for the M100 model, our robust internal valve, for easy inflation and air retention.

The maximum load of an M buoy is 60% of the stated buoyancy.

Do not use stainless steel in combination with galvanised iron, as this will cause galvanic corrosion, leading to very rapid degradation and rusting through the lower pivot and chain!
