- Length : 100 cm
- Model : Double element
- Weight : 11 kg
- Height : 40 cm
- Width : 50 cm
- Load per unit : 200 kg

SPECIFICATION

- The JETFLOAT modular pontoons are made of single or double elements linked together by connecting screws that can be turned by a quarter turn to lock or unlock a set of 4 cubes.

- Made of Lupolen, these elements have a very high density and a very high resistance. Almost indestructible, they also resist hydrocarbons, frost and are treated anti-UV.

- Light (11Kg for a cube-double), these elements can be assembled directly on the chosen site without requiring heavy and expensive means of handling.

- Different colors: black, blue, sand or light grey

- Applications: swimming platforms, piers, natural water pools, semi-rigid ""drive-on"" platforms, mooring pontoons, aquaculture enclosures, work platforms...

- Manufacture under ISO 9001 and ISO/TS 16949 standards
